Any other information that would be helpful for the instructor to know:

This capstone was completed as a one-person team, so every peer-facing item above is a self-assessment rather than a comparison. The scores reflect that I met every milestone I set, kept the work on schedule against the plan filed with my faculty mentor, and delivered the full scope without any workload to distribute.

The team-process dimensions (decision making, cooperation, conflict handling, balance of participation) are degenerate at $n = 1$ and are marked 1 because there was no process failure to report, not because they were meaningfully exercised. I'd flag that as the honest caveat on this form.

Net contribution is marked 1 (+60%) by definition: my share of the work was 100%.
